

Training Standard

Title	Hand held diamond drilling
Duration	Minimum 1 day of 6 hours learning
Purpose/ scope	<p>The purpose of training against this standard is to provide the candidates with the knowledge and understanding of carrying out hand held diamond drilling operations safely</p> <p>The scope includes:</p> <ul style="list-style-type: none"> - hazards - regulations - safe operations - various types of equipment - how the equipment works - components & accessories - ancillaries - general maintenance - troubleshooting
Occupational relevance	<p>Training delivered against this standard would be relevant to the following occupational group(s):</p> <ul style="list-style-type: none"> • operative and craft
Candidate pre-requisites	<p>Undertaken the basic course and have an understanding of abrasive wheels, including the safe use of the angle grinder and diamond drilling or completed the basic diamond drilling course.</p>
Instruction/ supervision	<p>Trainer approval through the Drilling & Sawing Association (DSA) - approved training provider route is required.</p> <p>As part of the DSA approved training provider route, as a minimum, course instructors must be able to demonstrate that, in relation to this standard, they have:</p> <ul style="list-style-type: none"> • a minimum of 5 years technically competent experience • a verifiable CV • a train the trainer or instructional techniques course certificate
Delivery	<p>Delivery methods for this course are classroom, demonstration and practical.</p> <p>The course can be delivered off the job environment.</p> <p>The course is set out to show safe working practices and Industry practices. The hand-held diamond drilling equipment and materials must be safe and sufficient and comply with the relevant legislation. The appropriate manufacturer's instructions must be accessible throughout the training.</p> <p>The class size and candidate/instructor ratio must allow training to be delivered in a safe manner and enable candidates to achieve the learning outcomes.</p> <p>The classroom and demonstration aspects of the course can accommodate up to 8 delegates per course. The practical elements will always be performed to a 6:1 candidate: trainer ratio.</p>

Training Standard

Assessment	For the successful completion of training, a learner will carry out an end-test in both theoretical and practical elements. The question bank will reflect the standards questions within the qualification. These end-tests along with their contribution throughout the course will be evaluated by a competent trainer.
Quality assurance	Quality assurance against this standard will require initial approval of the training organisation and their content mapped to the standard. CITB will also conduct an approval intervention, either desk-based or centre visit, to ensure the training organisation can meet the requirements of the Training Standard. Approved training organisations (ATOs) will be required to present information on records of training and assessment upon request to CITB for desk-based analysis. They will also be visited annually by the CITB quality assurance team.
Renewal	Non-mandatory refresher recommended every 3 years.
Approval date	November 2018
Review cycle	Either on request or in 3 years from approval date

Learning outcomes <i>The candidate will be able to:</i>	Additional guidance to support learning outcome
Undertake inspection and pre-start checks	Select and use the correct ancillary equipment including PPE. Prepare area for Diamond Drilling, including protection of surrounding area.
Describe how to handle and transport the equipment	Manufacturers operator's manual
Demonstrate how to safely use the machine including, measuring, setting up exclusion zone, securing, aligning, connecting water supply and protection	
Be able to use and maintain hand tools and ancillary equipment.	
Describe the functions of all the components used with the hand-held diamond drilling equipment	
Describe how to locate and protect services water, gas, electric etc	
Form drill holes or core in the structural fabric to instructions relating to vertical and horizontal surfaces	
Describe how to deal with voids	

Training Standard

A general understanding of maintenance
