

Training Standard

| | |
|-------------------------------------|--|
| Title | Ring sawing |
| Duration | Minimum 1 day of 6 hours learning |
| Purpose/ scope | <p>The purpose of training against this standard is to provide the candidates with the knowledge and understanding of carrying out ring sawing operations safely</p> <p>The scope includes:</p> <ul style="list-style-type: none"> - applications - provision and use of work equipment regulations (PUWER) - personal protective equipment (PPE) - types of saws - components and ancillaries - capabilities/characteristics - power sources - safe operations - fitment blade - process of cutting - general maintenance - troubleshooting |
| Occupational relevance | <p>Training delivered against this standard would be relevant to the following occupational group(s):</p> <ul style="list-style-type: none"> • operative and craft |
| Candidate pre-requisites | <p>Undertaken the basic course and have an understanding of diamond tipped segmented blades, including the safe use of the Disc Cutter/angle grinder.</p> |
| Instruction/ supervision | <p>Trainer approval through the Drilling & Sawing Association (DSA) - approved training provider route is required.</p> <p>As part of the DSA approved training provider route, as a minimum, course instructors must be able to demonstrate that, in relation to this standard, they have:</p> <ul style="list-style-type: none"> • a minimum of 5 years technically competent experience • a verifiable CV • a train the trainer or instructional techniques course certificate |

Training Standard

| | |
|--------------------------|---|
| Delivery | <p>Delivery methods for this course are classroom, demonstration and practical.</p> <p>The course can be delivered off the job environment.</p> <p>This module provides instruction in safe working practices and correct cutting procedures and methods to industry standards. The ring sawing equipment and materials must be safe and sufficient and comply with the relevant legislation. The appropriate manufacturer's instructions must be accessible throughout the training.</p> <p>The class size and candidate/instructor ratio must allow training to be delivered in a safe manner and enable candidates to achieve the learning outcomes.</p> <p>The classroom and demonstration aspects of the course can accommodate up to 8 delegates per course. The practical elements will always be performed to a 6:1 candidate: trainer ratio.</p> |
| Assessment | For the successful completion of training, a learner will carry out an end-test in both theoretical and practical elements. These end-tests along with their contribution throughout the course will be evaluated by a competent trainer. |
| Quality assurance | <p>Quality assurance against this standard will require initial approval of the training organisation and their content mapped to the standard.</p> <p>CITB will also conduct an approval intervention, either desk-based or centre visit, to ensure the training organisation can meet the requirements of the Training Standard.</p> <p>Approved training organisations (ATOs) will be required to present information on records of training and assessment upon request to CITB for desk-based analysis. They will also be visited annually by the CITB quality assurance team.</p> |
| Renewal | Non-mandatory refresher recommended every 3 years. |
| Approval date | November 2018 |
| Review cycle | Either on request or in 3 years from approval date |

| Learning outcomes | Additional guidance to support learning outcome |
|---|---|
| <i>The candidate will be able to:</i> | |
| Undertake inspection and pre-start checks | Select and use the correct ancillary equipment including personal protective equipment (PPE). Prepare area for ring sawing, including protection of surrounding area. |
| Describe how to handle and transport the equipment | |
| Demonstrate how to safely use the machine including, measuring, setting up exclusion zone, securing, aligning, connecting water supply and cutting process. | Operators Manual |
| Be able to use and maintain hand tools and ancillary equipment. | |

Training Standard

| | |
|--|--|
| Describe the functions of all the components used with the ring sawing equipment | |
| Describe how to complete pre-start and post stop checks | |
| Describe how to set up and operate: | |
| Describe how to locate and protect services water, gas, electric etc | |
| Cut the structural fabric to given instructions using a ring saw | |
| Describe how to deal with voids | |
| A general understanding of maintenance | |

Additional information about this standard

This standard has been established using the Drilling and Sawing Association: code of practice and the national occupation standards (NOS) for QCF unit QCF220
